The Gandhi Nobody Knows
Richard Grenier
(Published in ‘Commentary, March 1983, pp. 59-72, Movies Section)

I HAD the singular honor of attending an early private screening of Gandhi with an audience of invited guests from the National Council of Churches. At the end of the three-hour movie there was hardly, as they say, a dry eye in the house. When the lights came up I fell into conversation with a young woman who observed, reverently, that Gandhi’s Last words were “Oh God,” causing me to remark regretfully that the real Gandhi had not spoken in English, but had cried, Hai Rama! (“Oh, Rama”).

Well, Rama was just Indian for God, she replied, at which I felt compelled to explain that, alas, Rama, collectively with his three half-brothers, represented the seventh incarnation of Vishnu. The young woman, who seemed to have been under the impression that Hinduism was Christianity under another name, sensed somehow that she had fallen on an uncongenial spirit, and the conversation ended.

At a dinner party shortly afterward, a friend of mine, who had visited India many times and even gone to the trouble of learning Hindi, objected strenuously that the picture of Gandhi that emerges in the movie is grossly inaccurate, omitting, as one of many examples, that when Gandhi’s wife lay dying of pneumonia and British doctors insisted that a shot of penicillin would save her, Gandhi refused to have this alien medicine injected in her body and simply let her die. (It must be noted that when Gandhi contracted malaria shortly afterward he accepted for himself the alien medicine quinine, and that when he had appendicitis he allowed British doctors to perform on him the alien outrage of an appendectomy.) All of this produced a wistful moaning from an editor of a major newspaper and a recalcitrant, “But still . . .” I would prefer to explicate things more substantial than a wistful moaning, but there is little doubt it meant the editor in question felt that even of the real Mohandas K. Gandhi had been different from the Gandhi of the movie it would have been nice if he had been like the movie-Gandhi, and that presenting him in this admittedly false manner was beautiful, stirring, and perhaps socially beneficial.

An important step in the canonization of this movie-Gandhi was taken by the New York Film Critics Circle, which not only awarded the picture its prize as best film of 1982, but awarded Ben Kingsley, who played Gandhi (a remarkably good performance), its prize as best actor of the year. But I cannot believe for one second that these awards were made independently of the film’s content – which, not to put too fine a point on it, is an all-out appeal for pacifism – or in anything but the most shameful ignorance of the historical Gandhi.

Now it does not bother me that Shakespeare omitted from his King John the singing of the Magna Charta – by far the most important event in John’s reign. All Shakespeare’s “histories” are strewn with errors and inventions. Shifting to the cinema and to more recent times, it is hard for me to work up much indignation over the fact that neither Eisenstein’s Battleship Potemkin nor his October recounts historical episodes in anything like the manner in which they actually occurred (the famous march of the White Guards down the steps at Odessa – artistically one of the greatest sequences in film history – simply did not take place). As we draw closer to the present, however, the problem becomes much more difficult. If the Soviet Union were to make an artistically wondrous film about the entry of Russian tanks into Prague in 1968 (an event I happened to witness), and show them being greeted with flowers by a grateful populace, the Czechs dancing in the streets with joy, I do not guarantee that I would maintain my serene aloofness. A great deal depends on whether the historical events represented in a movie are intended to be taken as substantially true, and also on whether – separated from us by some decades or occurring yesterday – they are seen as having a direct bearing on courses of action now open to us.

On my second viewing of Gandhi, this time at a public showing at the end of the Christmas season, I happened to leave the theater behind three teenage girls, apparently from one of Manhattan’s fashionable private schools. “Gandhi was pretty much an FDR,” one opined, astonishing me almost as much by her breezy use of initials to invoke a President who died almost a quarter-century before her birth as by the stupefying nature of the comparison. “But he was a religious figure, too,” corrected one of her friends, adding somewhat smugly “It is not in our historical tradition to honor spiritual leaders.” Since her schoolteachers had clearly not led her to consider Jonathan Edwards and Roger Williams as spiritual leaders, let alone Joseph Smith and William Jennings Bryan, the intimation seemed to be that we are a society with poorer spiritual values than, let’s say, India. There can be no question, in any event, that the girls felt they had just been shown the historical Gandhi – an attitude shared by Ralph Nader, who at last account had seen the film three times. Nader has conceived the most extraordinary notion that Gandhi’s symbolic flouting of the British salt tax was a “consumer issue” which he later expanded into the wider one of Indian independence. A modern parallel to Gandhi’s program of home-spinning and home-weaving, another “consumer issue” says Nader, might be the use of solar energy to
free us from the “giant multinational oil corporations.”

As it happens, the government of India openly admits to having provided one-third of the financing of Gandhi out of state funds, straight out of the national treasury – and after close study of the finished product I would not be a bit surprised to hear that it was 100 percent. If Pandit Nehru is portrayed flattering in the film, one must remember that Nehru himself took part in the initial story conferences (he originally wanted Gandhi to be played by Alec Guinness) and that his daughter Indira Gandhi is, after all, Prime Minister of India (though no relation to Mohandas Gandhi). The screenplay was checked and rechecked by Indian officials at every stage, often by the Prime Minister herself, with close consultations on plot and even casting. If the movie contains a particularly poisonous portrait of Mohammed Ali Jinnah, the founder of Pakistan, the Indian reply, I suppose, would be that the Pakistanis want an attractive portrayal of Jinnah let them pay for their own casting. If the movie contains a character called Lord Mountbatten (India’s last Viceroy); a composite American journalist (assembled from Vincent Sheehan, William L. Shirer, Louis Fischer, and straight fiction); a character called simply “Viceroy” (presumably another composite); an assemblage of Gandhi’s Indian followers under the name of one of them (Patel); and of course Nehru.

I sorely missed the fabulous Annie Besant, that English clergyman’s wife, turned atheist, turned Theosophist, turned Indian nationalist, who actually became president of the Indian National Congress and had a terrific falling out with Gandhi, becoming his fierce opponent. And if the producers felt they had to work in a cameo role for an American star to add to the film’s appeal in the United States, it is positively embarrassing that they should have brought in the photographer Margaret Bourke-White, a person of no importance whatever in Gandhi’s life and a role Candice Bergen plays with a repellant unctuousness. If the film-makers had been interested in drama and not hagiography, it is hard to see how they could have resisted the awesome confrontation between Gandhi and, yes, Margaret Sanger. For the two did meet. Now there was a meeting of East and West, and may the better person win! (She did. Margaret Sanger argued her views on birth control with such vigor that Gandhi had a nervous breakdown.)

I cannot honestly say I had any reasonable expectation that the film would allow scenes of Gandhi’s pretty teenage girl followers fighting “hysterically” (the word was used) for the honor of sleeping naked with the Mahatma and cuddling the nude seaptuagenarian in their arms. (Gandhi was “testing” his vow of chastity in order to gain moral strength for his mighty struggle with Jinnah.) When told there was a man named Freud who said that, despite his declared intention, Gandhi might actually be enjoying the caresses of the naked girls, Gandhi continued, unperturbed. Nor, frankly, did I expect to see Gandhi giving daily enemas to all the young girls in his ashrams (his daily greeting was, “Have you had a good bowel movement this morning, sisters?”), nor see the girls giving him his daily enema. Although Gandhi seems to have written less about home rule for India than he did about enemas, and excrement, and latrine cleaning (“The bathroom is a temple. It should be so clean that anyone would enjoy eating there”), I confess such scenes might pose problems for a Western director.

Gandhi, therefore, the film, this paid political advertisement for the government of India, is organized around three axes: (1) Anti-racism – all men are equal regardless of race, color, creed, etc.; (2) anti-colonialism, which in present terms translates as support for the Third World, including, most eminently, India; (3) nonviolence, presented as an absolute pacifism. There are other, secondary precepts and sub-headings. Gandhi is portrayed as the quintessence of tolerance (“I am a Hindu and a Muslim and a Christian and a Jew”), of basic friendliness to Britain (“The British have been with us for a long time and when they leave we want them to leave as friends”), of devotion to his wife and family. His vow of chastity is represented as something selfless and holy, rather like the celibacy of the Catholic clergy. But, above all, Gandhi’s life and teachings are presented as having great import for us today. We must learn from Gandhi.

I propose to demonstrate that the film grotesquely distorts both Gandhi’s life and character to the point that it is nothing more than a pious fraud, and a fraud of the most egregious kind. Hackneyed Indian falsehoods such as that “the British keep trying to break India up” (as if Britain didn’t give India a unity it never enjoyed in history), or that the British created Indian poverty (a poverty which had not only existed
Gandhi had even greater confidence in his abilities as a “nature doctor,” prescribing obligatory cures for his ashramites, such as dried cow-dung powder and various concoctions containing cow dung (the cow, of course, being sacred to the Hindu). And to those he really loved he gave enemas – but again, alas, not to Margaret Bourke-White, which is not too bad, really. For admiring Candice Bergen’s work as I do, I would have been most interested in seeing how she would have experienced this beatitude. The scene might have lived in film history.

There are 400 biographies of Gandhi, and his writings run to 80 volumes, and since he lived to be seventy-nine, and rarely fell silent, there are, as I have indicated, quite a few inconsistencies. The authors of the present movie even acknowledge in a little-noticed opening title that they have made a film only true to Gandhi’s “spirit.” For my part, I do not intend to pick through Gandhi’s writings to make him look like Attila the Hun (although the thought is tempting), but to give a fair, weighted balance of his views, laying stress on his actions, and on what he told other men to do when the time for action had come.

Anti-racism: the reader will have noticed that in the present-day community of nations South Africa is a pariah. So it is an absolutely amazing piece of good fortune that Gandhi, born the son of the Prime Minister of a tiny Indian principality and received as an attorney at the bar of the Middle Temple in London, should have begun his climb to greatness as a member of the small Indian community in, precisely, South Africa. Natal, then a separate colony, wanted to limit Indian immigration and, as part of the government program, ordered Indians to carry identity papers (an action not without similarities to measures under consideration in the U.S. today to control illegal immigration). The film’s lengthy opening sequences are devoted to Gandhi’s leadership in the fight against Indians carrying their identity papers (burning their registration cards), with for good measure Gandhi being expelled from the first-class section of a railway train, and Gandhi being asked by whites to step off the sidewalk. This inspired young Indian leader calls, in the film, for interracial harmony, for the people to “live together.”

Now the time is 1893, and Gandhi is a “caste” Hindu, and from one of the higher castes. Although, later, he was to call for improving the lot of India’s Untouchables, he was not to have any serious misgivings about the fundamentals of the caste system for about another thirty years, and even then his doubts, to my way of thinking, were rather minor. In the India in which Gandhi grew up, and had only recently left, some castes could enter the courtyards of certain Hindu temples, while others could not. Some castes were forbidden to use the village well. Others were compelled to live outside the village, still others to leave the road at the approach of a person of higher caste and perpetually to call out, giving warning, so that no one would be polluted by their proximity. The endless intricacies of Hindu caste by-laws varied somewhat region by region, but in Madras, where most South African Indians were from, while a Nayar could pollute a man of higher caste only by touching him, Kammalans polluted at a distance of 24 feet, toddy drawers at 36 feet, Paulayans and Cherumans at 48 feet, and beef-eating Paraiyans at 64 feet. All castes and the thousands of sub-castes were forbidden, needless to say, to marry, eat, or engage in social activity with but members of their own group. In Gandhi’s native Gujarat, a caste Hindu who had been polluted by touch had to perform extensive ritual ablutions or purify himself by drinking a holy beverage composed of milk, whey, and (what else?) cow dung.

Low-caste Hindus, in short, suffered humiliations in their native India compared to which the carrying of identity cards in South Africa was almost trivial. In fact, Gandhi, to his credit, was to campaign strenuously...
in his later life for the reduction of caste barriers in India – a campaign almost invisible in the movie, of course, conveyed in only two glancing references, leaving the audience with the officially sponsored if historically astonishing notion that racism was introduced into India by the British. To present the Gandhi of 1893, a conventional caste Hindu, fresh from caste-ridden India where a Paraiyian could pollute at 64 feet, as the champion of interracial equitarianism is one of the most brazen hypocrisies I have ever encountered in a serious movie.

The film moreover, does not give the slightest hint as to Gandhi's attitude towards blacks, and the viewers of Gandhi would naturally suppose that, since the future Great Soul opposed South African discrimination against Indians, he would also oppose South African discrimination against black people. But this is not so. While Gandhi, in South Africa, fought furiously to have Indians recognized as loyal subjects of the British empire, and to have them enjoy the full rights of Englishmen, he had no concern for blacks whatever. In fact, during one of the “Kaffir Wars” he volunteered to organize a brigade of Indians to put down a Zulu rising, and was decorated himself for valor under fire.

For, yes, Gandhi (Sergeant Major Gandhi) was awarded Victoria’s coveted War Medal. Throughout most of his life Gandhi had the most inordinate admiration for British soldiers, their sense of duty, their discipline and stoicism in defeat (a trait he emulated himself). He marveled that they retreated with their heads high, like victors. There was even a time in his life when Gandhi, hardly to be distinguished from Kipling’s Gunga Din, wanted nothing so much as to be a soldier of the Queen. Since this is not in keeping with the “spirit” of Gandhi, as decided by Pandit Nehru and Indira Gandhi, it is naturally omitted from the movie.

Anti-colonialism: as almost always with historical films, even those more honest than Gandhi, the historical personage on which the movie is based is not only more complex but more interesting than the character shown on the screen. During his entire South African period, and for some time after, until he was about fifty, Gandhi was nothing more or less than an imperial loyalist, claiming for Indians the rights of Englishmen but unshakably loyal to the crown. He supported the empire ardent in no fewer than three wars: the Boer War, the “Kaffir War,” and, with the most extreme zeal, World War I. If Gandhi’s mind were of the modern European sort, this would seem to suggest that his later attitude towards Britain was the product of unrequited love: he had wanted to be an Englishman; Britain had rejected him and his people; very well then, they would have their own country.

But this would imply a point of “agonizing reappraisal,” a moment when Gandhi’s most fundamental political beliefs were reexamined and, after the most bitter soul-searching, repudiated. But I have studied the literature and cannot find this moment of bitter soul-searching. Instead, listening to his “inner voice” (which in the case of divines of all countries often speaks in the tones of holy opportunism), Gandhi simply, tranquilly, without announcing any sharp break, set off in a new direction.

It should be understood that it is unlikely Gandhi ever truly conceived of “becoming” an Englishman, first, because he was a Hindu to the marrow of his bones, and also, perhaps, because his democratic instincts were really quite weak. He was a man of the most extreme, autocratic temperament, tyrannical, unyielding even regarding things he knew nothing about, totally intolerant of all opinions but his own. He was, furthermore, in the highest degree reactionary, permitting in India no change in the relationship between the feudal lord and his peasants or servants, the rich and the poor. In his The Life and Death of Mahatma Gandhi, the best and least hagiographic of the full-length studies, Robert Payne, although admiring Gandhi greatly, explains Gandhi’s “new direction” on his return to India from South Africa as follows:

He spoke in generalities, but he was searching for a single cause, a single hard-edged task to which he would devote the remaining years of his life. He wanted to repeat his triumph in South Africa on Indian soil. He dreamed of assembling a small army of dedicated men around him, issuing stern commands and leading them to some almost unobtainable goal.

Gandhi, in short, was a leader looking for a cause. He found it, of course, in home rule for India and, ultimately, in independence.

WE ARE, therefore, presented with the seeming anomaly of a Gandhi who, in Britain when war broke out in August 1914, instantly contacted the War Office, swore that he would stand by England in its hour of need, and created the Indian Volunteer Corps, which he might have commanded if he hadn’t fallen ill with pleurisy. In 1915, back in India, he made a memorable speech in Madras in which he proclaimed, “I discovered that the British Empire had certain ideals with which I have fallen in love. . . .” In early 1918, as the war in Europe entered its final crisis, he wrote to the Viceroy of India, “I have an idea that if I become your recruiting agent-in-chief, I might rain men upon you,” and he proclaimed in a speech in Kheda that the British “love justice; they have shielded men against oppression.” Again, he wrote to the Viceroy, “I would make India offer all her able-bodied sons as sacrifice to the empire at this critical moment. . . .” To some of his pacifist friends, who were horrified, Gandhi replied by appealing to the Bhagavad Gita and to the endless wars recounted in the Hindu epics, the Ramayana and the Mahabharata, adding further to the pacifists’ horror by declaring that
Indians “have always been warlike, and the finest hymn composed by Tulsidas in praise of Rama gives the first place to his ability to strike down the enemy.”

This was in contradiction to the interpretation of sacred Hindu scriptures Gandhi had offered on earlier occasions (and would offer later), which was that they did not recount military struggles but spiritual struggles; but, unusual for him, he strove to find some kind of synthesis. “I do not say, ‘Let us go and kill the Germans,’ ” Gandhi explained. “I say, ‘Let us go and die for the sake of India and the empire.’” And yet within two years, the time having come for swaraj (home rule), Gandhi’s inner voice spoke again, and, the leader having found his cause, Gandhi proclaimed resoundingly: “The British empire today represents Satanism, and they who love God can afford to have no love for Satan.”

The idea of swaraj, originated by others, crept into Gandhi’s mind gradually. With a fair amount of winding about, Gandhi, roughly, passed through three phases. First, he was entirely pro-British, and merely wanted for Indians the rights of Englishmen (as he understood them). Second, he was still pro-British, but with the belief that, having proved their loyalty to the empire, Indians would be granted some degree of swaraj. Third, as the home-rule movement gathered momentum, it was the swaraj, the whole swaraj, and nothing but the swaraj, and he turned relentlessly against the crown. The movie to the contrary, he caused the British no end of trouble in their struggles during World War II.

BUT it should not be thought for one second that Gandhi’s finally full-blown desire to detach India from the British empire gave him the slightest sympathy with other colonial peoples pursuing similar objectives. Throughout his entire life Gandhi displayed the most spectacular inability to understand or even really take in people unlike himself – a trait which V.S. Naipaul considers specifically Hindu, and I am inclined to agree. Just as Gandhi had been totally unconcerned with the situation of South Africa’s blacks (he hardly noticed they were there until they rebelled), so now he was totally unconcerned with other Asians or Africans. In fact, he was adamantly opposed to certain Arab movements within the Ottoman empire for reasons of internal Indian politics.

At the close of World War I, the Muslims of India were deeply absorbed in what they called the “Khilafat” movement – “Khilafat” being their corruption of “Caliphate,” the Caliph in question being the Ottoman Sultan. In addition to his temporal powers, the Sultan of Ottoman empire held the spiritual position of Caliph, supreme leader of the world’s Muslims and successor to the Prophet Muhammad. At the defeat of the Central Powers (Germany, Austria, Turkey), the Sultan was a prisoner in his palace in Constantinople, shorn of his religious as well as his political authority, and the Muslims of India were incensed. It so happened that the former subject peoples of the Ottoman empire, principally Arabs, were perfectly happy to be rid of this Caliph, and even the Turks were glad to be rid of him, but this made no impression on the Muslims of India, for whom the issue was essentially a club with which to beat the British. Until this odd historical moment, Indian Muslims had felt little real allegiance to the Ottoman Sultan either, but now that he had fallen, the British had done it! The British had taken away their Khilafat! And one of the most ardent supporters of this Indian Muslim movement was the new Hindu leader, Gandhi.

No one questions that the formative period for Gandhi as a political leader was his time in South Africa. Throughout history Indians, divided into 1,500 languages and dialect groups (India today has 15 official languages), had little sense of themselves a nation. Muslim Indians and Hindu Indians felt about as close as Christians and Moors during their 700 years of cohabitation in Spain. In addition to which, the Hindus were divided into thousands of castes and sub-castes, and there were also Parsees, Sikhs, Jains. But in South Africa officials had thrown them all in together, and in the mind of Gandhi (another one of those examples of nationalism being born in exile) grew the idea of India as a nation, and Muslim-Hindu friendship became one of the few positions on which he never really reversed himself. So Gandhi – ignoring Arabs and Turks – became an ardent supporter of the Khilafat movement out of strident Indian nationalism. He had become a national figure in India for having unified 13,000 Indians of all faiths in South Africa, and now he was determined to reach new heights by unifying hundreds of millions of Indians of all faiths in India itself. But this nationalism did not please everyone, particularly Tolstoy, who in his last years carried on a curious correspondence with the new Indian leader. For Tolstoy, Gandhi’s Indian nationalism “spoils everything.”

As for the “anti-colonialism” of the nationalist Indian state since independence, Indira Gandhi, India’s present Prime Minister, hears an inner voice of her own, it would appear, and this inner voice told her to justify the Soviet invasion of Afghanistan as produced by provocative maneuvers on the part of the U.S. and China, as well as to be the first country outside the Soviet bloc to recognize the Hanoi puppet regime in Cambodia. So everything plainly depends on who is colonizing whom, and Mrs. Gandhi’s voice perhaps tells her that the subjection of Afghanistan and Cambodia to foreign rule is “defensive” colonialism. And the movie’s message that Mahatma Gandhi, and by plain implication India (the country for which he plays the role of Joan of Arc), have taken a holy, unchanging stance against the colonialism of nation by nation is just another of its hypocrisies. For India, when it comes to colonialism or anti-colonialism, it has always been Realpolitik all the way.
Nonviolence: but the real center and raison d’etre of Gandhi is ahimsa, nonviolence, which principle when incorporated into vast campaigns of noncooperation with British rule the Mahatama called by an odd name he made up himself, Satyagraha, which means something like “truth-striving.” During the key part of his life, Gandhi devoted a great deal of time explaining the moral and philosophical meanings of both ahimsa and satyagraha. But much as the film sanitizes Gandhi to the point where one would mistake him for a Christian saint, and sanitizes India to the point where one would take it for Shangri-la, it quite sweeps away Gandhi’s ethical and religious ponderings, his complexities, his qualifications, and certainly his vacillations, which simplifying process leaves us with our old European friend: pacifism. It is true that Gandhi was much impressed by the Sermon on the Mount, his favorite passage in the Bible, which he read over and over again. But for all the Sermon’s inspirational value, and its service as an ideal in relations among individual human beings, no Christian state which survived has ever based its policies on the Sermon on the Mount since Constantine declared Christianity the official religion of the Roman empire. And no modern Western state which survives can ever base its policies on pacifism. And no Hindu state will ever base its policies on ahimsa. Gandhi himself – although the film dishonestly conceals this from us – many times conceded that in dire circumstances “war may have to be resorted to as a necessary evil.”

It is something of an anomaly that Gandhi, held in popular myth to be a pure pacifist (a myth which governments of India have always been at great pains to sustain in the belief that it will affect credit on India itself, and to which the present movie adheres slavishly), was until fifty not ill-disposed to war at all. As I have already noted, in three wars, no sooner had the bugles sounded than Gandhi not only gave his support, but was clamoring for arms. To form new regiments! To fight! To destroy the enemies of the empire! Regular Indian army units fought in both the Boer War and World War I, but this was not enough for Gandhi. He wanted to raise new troops, even, in the case of the Boer and Kaffir Wars, from the tiny Indian colony in South Africa. British military authorities thought it not really worth the trouble to train such a small body of Indians as soldiers, and were even resistant to training them as an auxiliary medical corps (“stretcher bearers”), but finally yielded to Gandhi’s relentless importuning. As first instructed, the Indian Volunteer Corps was not supposed actually to go into combat, but Gandhi, adamant, led his Indian volunteers into the thick of battle. When the British commanding officer was mortally wounded during an engagement in the Kaffir War, Gandhi – though his corps’ deputy commander – carried the officer’s stretcher himself from the battlefield and for miles over the sun-baked veldt. The British empire’s War Medal did not have its name for nothing, and it was generally earned.

ANYONE who wants to wade through Gandhi’s endless ruminations about himsa and ahimsa (violence and nonviolence) is welcome to do so, but it is impossible for the skeptical reader to avoid the conclusion – let us say in 1920, when swaraj (home rule) was all the rage and Gandhi’s inner voice started telling him that ahimsa was the thing – that this inner voice knew what it was talking about. By this I mean that, though Gandhi talked with the tongue of Hindu gods and sacred scriptures, his inner voice had a strong sense of expediency. Britain, if only comparatively speaking, was a moral nation, and nonviolent civil disobedience was plainly the best and most effective way of achieving Indian independence. Skeptics might also not be surprised to learn that as independence approached, Gandhi’s inner voice began to change its tune. It has been reported that Gandhi “half-welcomed” the civil war that broke out in the last days. Even a fratricidal “bloodbath” (Gandhi’s word) would be preferable to the British.

And suddenly Gandhi began endorsing violence left, right, and center. During the fearsome rioting in Calcutta he gave his approval to men “using violence n amoral cause.” How could he tell them that violence was wrong, he asked, “unless I demonstrate that nonviolence is more effective?” He blessed the Nawab of Maler Kotla when he gave orders to shoot ten Muslims for every Hindu killed in his state. He sang the praises of Subhash Chandra Bose, who, sponsored by first the Nazis and then the Japanese, organized in Singapore an Indian National Army with which he hoped to conquer India with Japanese support, establishing a totalitarian dictatorship. Meanwhile, after independence in 1947, the armies of the India that Gandhi had created immediately marched into battle, incorporating the state of Hyderabad by force and making war in Kashmir on secessionist Pakistan. When Gandhi was assassinated by a Hindu extremist in January 1948 he was honored by the new state with a vast military funeral – in my view by no means inapposite.

BUT it is not widely realized (nor will this film tell you) how much violence was associated with Gandhi’s so-called “nonviolent” movement from the very beginning. India’s Nobel Prize-winning poet, Rabindranath Tagore had sensed a strong current of nihilism in Gandhi almost from his first days, and as early as 1920 wrote of Gandhi’s “fierce joy of annihilation,” which Tagore feared would lead India into hideous orgies of devastation – which ultimately proved to be the case. Robert Payne has said that there was an unquestionably an “unhealthy atmosphere” among many of Gandhi’s fanatic followers, and that Gandhi’s habit of going to the edge of violence and then suddenly retreating was fraught with danger. “In matters of conscience I am uncompromising,” proclaimed Gandhi proudly: “Nobody can make me yield.” The judgement of Tagore was categorical. Much as
he might revere Gandhi as a holy man, he quite detested him as a politician and considered that his campaigns were almost always so close to violence that it was utterly disingenuous to call them nonviolent.

For every _Satyagraha_ true believer, moreover, sworn not to harm his adversary or even lift a finger in his own defense, there were sometimes thousands of incensed freebooters and skirmishers bound by no such vow. Gandhi, to be fair, was aware of this, and nominally deplored it – but with nothing like the consistency shown in the movie. The film leads the audience to believe that Gandhi’s first “fast unto death,” was against an act of barbarous violence, the slaughter by an Indian crowd of a detachment of police constables. But in actual fact Gandhi reserved this “ultimate weapon” of his to interdict a 1931 British proposal to grant Untouchables a “separate electorate” in the Indian national legislature – in effect a kind of affirmative-action program for Untouchables. For reasons I have not been able to decrypt, Gandhi was dead set against the project, but I confess it is another scene I would have liked to have seen in the movie: Gandhi almost starving himself to death to block affirmative action for Untouchables.

From what I have been able to decipher, Gandhi’s main preoccupation in this particular struggle was not even the British. Benefitting from the immense publicity, he wanted to induce Hindus, overnight, ecstatically, and without any of these British legalisms to “open their hearts” to Untouchables. For a whole week Hindu India was caught up in a joyous delirium. No more would the Untouchables be scavengers and sweepers! No more would they be banned from Hindu temples! No more would they pollute at 64 feet! It lasted just a week. Then the temple doors swung shut again, and all was as before. Meanwhile, on the passionate subject of _swaraj_, Gandhi was crying, “I would not flinch from sacrificing a million Indian lives for India’s liberty!” The million Indian lives were indeed sacrificed, and in full. They fell, however, not to the bullets of British soldiers but to the knives and clubs of their fellow Indians in savage butcheries when the British finally withdrew.

ALTHOUGH the movie sneers at this reasoning as being the flimsiest of pretexts, I cannot imagine an impartial person studying the subject without concluding that concern for Indian religious minorities was one of the principal reasons Britain stayed in India as long as it did. When it finally withdrew, blood-maddened mobs surged through the streets from one end of India to the other, the majority group in each area, Hindu or Muslim, slaughtering the defenseless minority without mercy in one of the most hideous periods of carnage of modern history.

A comparison is in order. At the famous Amritsar massacre of 1919, shot in elaborate and loving detail in the present movie and treated by post-independence Indian historians as if it were Auschwitz, Gurkha troops under the command of a British officer, General Dyer, fired into an unarmed crowd of Indians defying a ban and demonstrating for Indian independence. The crowd contained women and children; 379 persons died; it was all quite horrible. Dyer was court-martialed and cashiered, but the incident lay heavily on British consciences for the next three decades, producing a severe inhibiting effect. Never again would the British empire commit another Amritsar, anywhere.

As soon as the oppressive British were gone, however, the Indians – gentle, tolerant people that they are – gave themselves over to an orgy of bloodletting. Trained troops did not pick off targets at a distance with Enfield rifles. Blood-crazed Hindus, or Muslims, ran through the streets with knives, beheading babies, stabbing women, old people. Interestingly, our movie shows none of this on camera (the oldest way of hiding the deck in Hollywood). All we see is the aged Gandhi, grieving, and of course fasting, at these terrible reports of riots. And, naturally, the film doesn’t whisper a clue as to the total number of dead, which might spoil the mood somehow. The fact is that we will never know how many Indians were murdered by other Indians during the country’s Independence Massacres, but almost all serious studies place the figure over a million, and some, such as Payne’s sources, go to 4 million. So, for those who like round numbers, the British killed some 400 seditious colonials at Amritsar and the name Amritsar lives in infamy, while Indians may have killed some 4 million of their own countrymen for no other reason than that they were of a different religious faith and people think their great leader would make an inspirational subject for a movie. _Ahimsa_, as can be seen, then, had an absolutely tremendous moral effect when used against Britain, but not only would it not have worked against Nazi Germany (the most obvious reproach, and of course quite true), but, the crowning irony, it had virtually no effect whatever when Gandhi tried to bring it into play against violent Indians.

Despite this at best patchy record, the film-makers have gone to great lengths to imply that this same principle of _Ahimsa_ – presented in the movie as the purest form of pacifism – is universally effective, yesterday, today, here, there, everywhere. We hear no talk from Gandhi of war sometimes being a “necessary evil,” but only him announcing – and more than once – “An eye for an eye makes the whole world blind.” In a scene very near the end of the movie, we hear Gandhi say, as if after deep reflection: “Tyrants and murderers can seem invincible at the time, but in the end they always fall. Think of it, Always.” During the last scene of the movie, following the assassination, Margaret Bourke-White is keening over the death of the Great Soul with an English admiral’s daughter named Madeleine Slade, in whose bowl movements Gandhi took the deepest interest (see their correspondence), and Miss Slade remarks incredulously that Gandhi felt that he had failed.
They are then both incredulous for a moment, after which Miss Slade observes mournfully, "When we most needed it [presumably meaning during World War II], he offered the world a way out of madness. But the world didn't see it." Then we hear once again the assassin's shots, Gandhi's "Oh, God," and last, in case we missed them the first time, Gandhi's words (over the shimmering waters of the Ganges?): "Tyrants and murderers can seem invincible at the time, but in the end they always fall. Think of it. Always." This is the end of the picture.

NOW, as it happens, I have been thinking about tyrants and murderers for some time. But the fact that in the end they always fall has never given me much comfort, partly because, not being a Hindu and not expecting reincarnation after reincarnation, I am simply not prepared to wait them out. It always occurs to me that, while I am waiting around for them to fall, they might do something mean to me, like fling me into a gas oven or send me off to a Gulag. Unlike a Hindu and not worshipping statis, I am also given to wondering who is to bring these murderers and tyrants down, it being all too risky a process to wait for them and the regimes they establish simply to die of old age. The fact that a few reincarnations from now they will all have turned to dust somehow does not seem to suggest a rational strategy for dealing with the problem.

Since the movie's Madeleine Slade specifically invites us to revere the way "out of madness" that Gandhi offered the world at the time of World War II, I am under the embarrassing obligation of recording exactly what courses of action the Great Soul recommended to the various parties involved in that crisis. For Gandhi was never stinging in his advice. Indeed, the less he knew about a subject, the less he stinted.

I am aware that for many not privileged to have visited the former British Raj, the names Gujarat, Rajasthan, and Deccan are simply words. But other names, such as Germany, Poland, Czechoslovakia, somehow have a harder profile. The term "Jew," also, has a reasonably hard profile, and I feel all Jews sitting emotionally at the movie Gandhi should be apprised of the advice that the Mahatma offered their coreligionists when faced with the Nazi peril: they should commit collective suicide. If only the Jews of Germany had the good sense to offer their throats willingly to the Nazi butchers' knives and throw themselves into the sea from cliffs they would arouse world public opinion, Gandhi was convinced, and their moral triumph would be remembered for "ages to come." If they would only pray for Hitler (as their throats were cut, presumably), they would leave a "rich heritage to mankind." Although Gandhi had known Jews from his earliest days in South Africa -- where his three staunchest white supporters were Jews, every one -- he disapproved of how rarely they loved their enemies. And he never repented of his recommendation of collective suicide. Even after the war, when the full extent of the Holocaust was revealed, Gandhi told Louis Fischer, one of his biographers, that the Jews died anyway, didn't they? They might as well have, died significantly.

Gandhi's views on the European crisis were not entirely consistent. He vigorously opposed Munich, distrusting Chamberlain. "Europe has sold her soul for the sake of a seven days' earthly existence," he declared. "The peace that Europe gained at Munich is a triumph of violence." But when the Germans moved into the Bohemian heartland, he was back to urging nonviolent resistance, exhorting the Czechs to go forth, unarmed, against the Wehrmacht, perishing gloriously -- collective suicide again. He had Madeleine Slade draw up two letters to President Eduard Benes of Czechoslovakia, instructing him on the proper conduct of Czechoslovak satyagrahi when facing the Nazis.

When Hitler attacked Poland, however, Gandhi suddenly endorsed the Polish army's military resistance, calling it "almost nonviolent." (If this sounds like double-talk, I can only urge readers to read Gandhi.) He seemed at this point to have a rather low opinion of Hitler, but when Germany's panzer divisions turned west, Allied armies collapsed under the ferocious onslaught, and British ships were streaming across the Straits of Dover from Dunkirk, he wrote furiously to the Viceroy of India: "This manslaughter must be stopped. You are losing; if you persist, it will only result in greater bloodshed. Hitler is not a bad man. . . ."

Gandhi also wrote an open letter to the British people, passionately urging them to surrender and accept whatever fate Hitler had prepared for them. "Let them take possession of you beautiful island with your many beautiful buildings. You will give all these, but neither your souls, nor your minds." Since none of this had the intended effect, Gandhi, the following year, addressed an open letter to the prince of darkness himself, Adolf Hitler.

THE scene must be pictured. In late December 1941, Hitler stood at the pinnacle of his might. His armies, undefeated -- anywhere -- ruled Europe from the English Channel to the Volga. Rommel had entered Egypt. The Japanese had reached Singapore. The U.S. Pacific Fleet lay at the bottom of Pearl Harbor. At this superbly chosen moment, Mahatma Gandhi attempted to convert Adolf Hitler to the ways of nonviolence. "Dear Friend," the letter begins, and proceeds to a heartfelt appeal to the Fuhrer to embrace all mankind "irrespective of race, color, or creed." Every admirer of the film Gandhi should be compelled to read this letter. Surprisingly, it is not known to have had any deep impact on Hitler. Gandhi was no doubt disappointed. He moped about, really quite depressed, but still knew he was right. When the Japanese, having cut their way through Burma, threatened India, Gandhi's strategy was to let them occupy as much of India as they liked and then to "make them feel
unwanted.” His way of helping his British “friends” was, at one of the worst points of the war, to launch massive civil disobedience campaigns against them, paralyzing some of their efforts to defend India from the Japanese.

Here, then, is your leader, O followers of Gandhi: a man who thought Hitler’s heart would be melted by an appeal to forget race, color, and creed, and who was sure the feelings of the Japanese would be hurt if they sensed themselves unwanted. As world-class statesmen go, it is not a very good record. Madeleine Slade was right, I suppose. The world certainly didn’t listen to Gandhi. Nor, for that matter, has the modern government of India listened to Gandhi. Although all Indian politicians of all political parties claim to be Gandhians, India has blithely fought three wars against Pakistan, one against China, and even invaded and seized tiny, helpless Goa, and all without a thought of ahimsa. And of course India now has atomic weapons, a satyagraha technique if ever there was one.

I AM SURE that almost everyone who sees the movie Gandhi is aware that, from a religious point of view, the Mahatma was something called a “Hindu” – but I do not think one in a thousand has the dimmest notion of the fundamental beliefs of the Hindu religion. The simplest example is Gandhi’s use of the word “God,” which, for members of the great Western religions – Christianity, Judaism, and Islam, all interrelated – means a personal god, a godhead. But when Gandhi said “God” in speaking English, he was merely translating from Gujarati or Hindi, and from the Hindu culture. Gandhi, in fact, simply did not believe in a personal God, and wrote in so many words, “God is not a person . . . but a force; the undefinable mysterious Power that pervades everything; a living Power that is Love. . . .” And Gandhi’s very favorite definition of God, repeated many times, was, “God is Truth,” which reduces God to some kind of abstract principle.

Like all Hindus, Gandhi also believed in the “Great Oneness,” according to which everything is part of God, meaning not just you and me and everyone else, but every living creature, every plant, thepitcher of milk, the milk in the pitcher, the tumbler into which the milk is poured. . . . After all of which, he could suddenly pop up with a declaration that God is “the Maker, the Law-Giver, a jealous Lord,” phrases he had probably picked up in the Bible and, with Hindu fluidity, felt he could throw in so as to embrace even more of the Great Oneness. So when Gandhi said, “I am a Hindu and a Muslim and a Christian and a Jew,” it was (from a Western standpoint) Hindu double-talk. Hindu holy men, some of them reformers like Gandhi, have actually even “converted” to Islam, then Christianity, or whatever, to worship different “aspects” of the Great Oneness, before reconverting to Hinduism. Now for Christians, fastidious in matters of doctrine, a man who converts to Islam is an apostate (or vice versa), but a Hindu is a Hindu is a Hindu. The better to experience the Great Oneness, many Hindu holy men feel they should be women as well as men, and one quite famous one even claimed he could menstruate (I will spare the reader the details).

IN THIS ecumenical age, it is extremely hard to shake Westerners loose from the notion that the devout of all religions, after all, worship “the one God.” But Gandhi did not worship the one God. He did not worship the God of mercy. He did not worship the God of forgiveness. And for the simple reason that the concepts of mercy and forgiveness are absent from Hinduism. In Hinduism, men do not pray to God for forgiveness, and a man’s sins are never forgiven – indeed, there is no one out there to do the forgiving. In your next life you may be born someone higher up the caste scale, but in this life there is no hope. For Gandhi, a true Hindu, did not believe in man’s immortal soul. He believed with every ounce of his being in karma, a series, perhaps a long series, of reincarnations, and at the end, with great good fortune; mukti, liberation from suffering and the necessity of rebirth, nothingness. Gandhi once wrote to Tolstoy (of all people) reincarnation explained “reasonably the many mysteries of life.” So if Hindus today still treat an Untouchable as barely human, this is thought to be perfectly right and fitting because of his actions in earlier lives. As can be seen, Hinduism, by its very theology, with its sacred triad of karma, reincarnation, and caste (with caste an absolutely indispensable part of the system) offers the most complacent justification of inhumanity of any of the world’s great religious faiths.

Gandhi, needless to say, was a Hindu reformer, one of many. Until well into his fifties, however, he accepted the caste system in toto as the “natural order of society,” promoting control and discipline and sanctioned by his religion. Later, in bursts of zeal, he favored moderating it in a number of ways. But he stuck by the basic varna system (the four main caste groupings plus the Untouchables) until the end of his days, insisting that a man’s position and occupation should be determined essentially by birth. Gandhi favored milder treatment of Untouchables, renaming them Harijans, “children of God,” but a Harijan was still a Harijan. Perhaps because his frenzies of compassion were so extreme (no, no, he would clean the Harijan’s latrine), Hindu reverence for him as a holy man became immense, but his prescriptions were rarely followed. Industrialization and modernization have introduced new occupations and sizable social and political changes in India, but the caste system has dexterously adapted and remains largely intact today. The Sudras still labor. The sweepers still sweep. Max Weber, in his The Religion of India, after quoting the last line of the Communist Manifesto, suggests somewhat sardonically that low-caste Hindus, too, have “nothing to lose but their chains,” that they, too, have “a world to win” – the only problem
being that they have to die first and get born again, higher, it is to be hoped, in the immutable system of caste. Hinduism in general, wrote Weber, “is characterized by a dread of the magical evil of innovation.” Its very essence is to guarantee status.

In addition to its literally thousands of castes and sub-castes, Hinduism has countless sects, with discordant rites and beliefs. It has no clear ecclesiastical organization and no universal body of doctrine. What I have described above is your standard, no-frills Hindu, of which in many ways Gandhi was an excellent example. With the reader’s permission I will skip over the Upanishads, Vedanta, Yoga, the Puranas, Tantra, Bhakti, the Bhagvad-Gita (which contains theistic elements), Brahma, Vishnu, Shiva, and the terrible Kali or Durga, to concentrate on those central beliefs that most motivated Gandhi’s behavior as a public figure.

IT SHOULD be plain by now that there is much in the Hindu culture that is distasteful to the Western mind, and consequently is largely unknown in the West – not because Hindus do not go on and on about these subjects, but because a Western squeamishness usually prevents these preoccupations from reaching print (not to mention film). When Gandhi attended his first Indian National Congress he was most distressed at seeing the Hindus – not laborers but high-caste Hindus, civic leaders – defecating all over the place, as if to pay attention to where the feces fell was somehow unclean. (For, as V.S. Naipaul put it, in a twisted Hindu way it is unclean to clean. It is unclean even to notice. “It was the business of the sweepers to remove excrement, and until the sweepers came, people were content to live in the midst of their own excrement.”) Gandhi exhorted Indians endlessly on the subject, saying that sanitation was the first need of India, but he retained an obvious obsession with excreta, gleefully designing latrines and latrine drills for all hands at the ashram, and, all in all, what with giving and taking enemas, and his public bowel movements and his deep concern with everyone else’s bowel movements (much correspondence), and endless dietary experiments as a function of bowel movements, he devoted a rather large share of his life to the matter. Despite his constant campaigning for sanitation, it is hard to believe that Gandhi was not permanently marked by what Arthur Koestler terms the Hindu “morbid infatuation with filth,” and what V.S. Naipaul goes as far as to call the Indian “deification of filth.” (Decades later, Krishna Menon, a Gandhian and one-time Indian Defense Minister, was still fortifying his sanctity by drinking a daily glass of urine.)

But even more important, because it is dealt with in the movie directly – if of course dishonestly – is Gandhi’s parallel obsession with brahmacharya, or sexual chastity. There is a scene late in the film in which Margaret Bourke-White (again!) asks Gandhi’s wife if he has ever broken his vow of chastity, taken, at that time, about forty years before. Gandhi’s wife, by now a sweet old lady, answers wistfully, with a pained little note of hope, “Not yet.” What lies behind this adorable scene is the following: Gandhi held as one of his most profound beliefs (a fundamental doctrine of Hindu medicine) that a man, as a matter of the utmost importance, must conserve his bindu, or seminal fluid. Koestler (in The Lotus and the Robot) gives a succinct account of this belief, widespread among orthodox Hindus: “A man’s vital energy is concentrated in his seminal fluid, and this is stored in a cavity in the skull. It is the most precious substance in the body... and elixir of life both in the physical and the mystical sense, distilled from the blood... A large store of bindu of pure quality guarantees health, longevity, and supernatural powers... Conversely, every loss of it is a physical and spiritual impoverishment.” Gandhi himself said in so many words, “A man who is unchaste loses stamina, becomes emasculated and cowardly, while in the chaste man secretions [semen] are sublimated into a vital force pervading his whole being.” And again, still Gandhi: “Ability to retain and assimilate the vital liquid is a matter of long training. When properly conserve it is transmuted into matchless energy and strength.” Most male Hindus go ahead and have sexual relations anyway, of course, but the belief in the value of the bindu leaves the whole culture in what many observers have called a permanent state of “semen anxiety.” When Gandhi once had a nocturnal emission he almost had a nervous breakdown.

Gandhi was a truly fanatical opponent of sex for pleasure, and worked it out carefully that a married couple should be allowed to have sex three to four times in a lifetime, merely to have children, and favored embodying this restriction in the law of the land. The sexual-gratification wing of the present-day feminist movement would find little to attract them in Gandhi’s doctrine, since in all his seventy-nine years it never crossed his mind once that there could be anything enjoyable in sex for women, and he was constantly enjoining Indian women to deny themselves to men, to refuse to let their husbands “abuse” them. Gandhi had been married at thirteen, and when he took his vow of chastity, after twenty-four years of sexual activity. He ordered his two oldest sons, both young men, to be totally chaste as well.

BUT Gandhi’s monstrous behavior to his own family is notorious. He denied his sons education – to which he was bitterly hostile. His wife remained illiterate. Once when she was very sick, hemorrhaging badly, and seemed to be dying, he wrote to her from jail icily: “My struggle is not a happiness.” To die, that is. On another occasion he wrote, speaking about her: “I simply cannot bear to look at
Ba’s face. The expression is often like that on the face of a meek cow and gives one the feeling, as a cow occasionally does, that in her own dumb manner she is saying something. I see, too, that there is selfishness in this suffering of hers. . . .” And in the end he let her die, as I have said, rather than allow British doctors to give her a shot of penicillin (while his inner voice told him that it would be all right for him to take quinine). He disowned his oldest son, Harilal, for wishing to marry. He banished his second son for giving his struggling older brother a small sum of money. Harilal grew quite wild with rage against his father, attacked him in print, converted to Islam, took to women, drink, and died an alcoholic in 1948. The Mahatma attacked him right back in his pious way, proclaiming modestly in an open letter in Young India, “Men may be good, not necessarily their children.”

IF THE reader thinks I have delivered unduly harsh judgements on India and Hindu civilization, I can refer him to An Area of Darkness and India: A Wounded Civilization, two quite brilliant books on India by V.S. Naipaul, a Hindu, and a Brahmin, born in Trinidad. In the second, the more discursive, Naipaul writes that India has “little to offer the world except its Gandhian concept of holy poverty and the recurring crooked comedy of its holy men, and . . . is now dependent in every practical way on other, imperfectly understood civilizations.”

Hinduism, Naipaul writes, “has given men no idea of a contract with other men, no idea of the state. It has enslaved one quarter of the population [the Untouchables] and always has left the whole fragmented and vulnerable. Its philosophy of withdrawal has diminished men intellectually and not equipped them to respond to challenge; it has stifled growth. So that again and again in India history has repeated itself: vulnerability, defeat, withdrawal.” Indians, Naipaul says, have no historical notion of the past. “Through centuries of conquest the civilization declined into an apparatus for survival, turning away from the mind . . . and creativity . . . stripping itself down, like all decaying civilizations, to its magical practices and imprisoning social forms.” He adds later, “No government can survive on Gandhian fantasy; and the spirituality, the solace of a conquered people, which Gandhi turned into a form of national assertion, has soured most obviously into the nihilism that it always was.” Naipaul condemns India again and again for its “intellectual parasitism,” its “intellectual vacuum,” its “emptiness,” the “blankness of its decayed civilization.” “Indian poverty is more dehumanizing than any machine; and, more than in any machine civilization, men in India are units, locked up in the strictest obedience by their idea of their dharma . . . The blight of caste is not only unmentionable and the consequent deification in India of filth; the blight, in an India that tries to grow, is also the overall obedience it imposes, . . . the diminishing of adventurousness, the pushing away from men of individuality and the possibility of excellence.”

Although Naipaul blames Gandhi as well as India itself for the country’s failure to develop an “ideology” adequate for the modern world, he grants him one or more magnificent moments – always, it should be noted, when responding to “other civilizations.” For Gandhi, Naipaul remarks pointedly, had matured in alien societies: Britain and South Africa. With age, back in India, he seemed from his autobiography to be headed for “lunacy,” says Naipaul, and was only rescued by external events, his reactions to which were determined in part by “his experience of the democratic ways of South Africa” [my emphasis]. For it is one of the enduring ironies of Gandhi’s story that it was in South Africa – South Africa – a country in which he became far more deeply involved than he had been in Britain, that Gandhi caught a warped glimmer of that strange institution of which he would never have seen even a reflection within Hindu society: democracy.

ANOTHER of Gandhi’s most powerful obsessions (to which the movie alludes in such a syrupy and misleading manner that it would be quite impossible for the audience to understand it) was his visceral hatred of the modern, industrial world. He even said, more than once, that he actually wouldn’t mind if the British remained in India, to police it, conduct foreign policy, and such trivia, if it would only take away its factories and railways. And Gandhi hated, not just factories and railways, but also the telegraph, the telephone, the radio, the airplane. He happened to be in England, when Louis Bleriot, the great French aviation pioneer, first flew the English Channel – an event which at the time stirred as much excitement as Lindbergh’s later flight across the Atlantic – and Gandhi was in a positive fury that giant crowds were acclaiming such an insignificant event. He used the telegraph extensively himself, of course, and later would broadcast daily over All-India Radio during his highly publicized fasts, but consistency was never Gandhi’s strong suit.

Gandhi’s view of the good society, about which he wrote ad nauseam, was an Arcadian vision set far in India’s past. It was the pristine Indian village, where, with all diabolical machinery and technology abolished – and with them all unhappiness – contented villagers would hand-spin their own yarn, hand-weave their own cloth, serenely follow their bullocks in the fields, tranquilly prodding them in the anus in the time-hallowed Hindu way. This was why Gandhi taught himself to spin, and why all the devout Gandhians, like monkeys, spun also. This was Gandhi’s program. Since he said it several thousand times, we have no choice but to believe that he sincerely desired the destruction of modern technology and industry and the return of India to the way of life of an idyllic (and quite likely non-existent) past. And yet this same Mahatma Gandhi hand-picked as the first Prime Minister of an independent India Pandit Nehru, who was
committed to a policy of industrialization and for whom the last word in the politico-economic organization of the state was (and remained) Beatrice Webb.

WHAT are we to make of this Gandhi? We are dealing with two strangenesses here, Indians and Gandhi himself. The plain fact is that both Indian leaders and the Indian people ignored Gandhi’s precepts almost as thoroughly as did Hitler. They ignored him on sexual abstinence. They ignored his modifications of the caste system. They ignored him on the evils of modern industry, the radio, the telephone. They ignored him on education. They ignored his appeals for national union, the former British Raj splitting into a Muslim Pakistan and a Hindu India. No one sought a return to the Arcadian Indian village of antiquity. They ignored him, above all, on ahimsa, nonviolence. There was always a small number of exalted satyagrahi who, martyrs, would march into the constables’ truncheons, but one of the things that alarmed the British – as Tagore indicated – was the explosions of violence that accompanied all this alleged nonviolence. Naipaul writes that with independence India discovered again that it was “cruel and horribly violent.” Jaya Prakash Narayan, the late opposition leader, once admitted, “We often behave like animals... We are more likely than not to become aggressive, wild, violent. We kill and burn and loot...”

Why, then, did the Hindu masses so honor this Mahatma, almost all of whom their most cherished beliefs they so pointedly ignored, even during his lifetime? For Hindus, the question is not really so puzzling. Gandhi, for them, after all, was a Mahatma, a holy man. He was a symbol of sanctity, not a guide to conduct. Hinduism has a long history of holy men who, traditionally, do not offer themselves up to the public as models of general behavior but withdraw from the world, often into an ashram, to pursue their sanctity in private, a practice which all Hindus honor, if few emulate. The true oddity is that Gandhi, this holy man, having drawn from British sources his notions of nationalism and democracy, also absorbed from the British his model of virtue in public life. He was a historical original, a Hindu holy man that a British model of public service and dazzling advances in mass communication thrust out into the world, to become a great moral leader and the “father of his country.”

SOME Indians feel that after the early 1930’s, Gandhi, although by now world-famous, was in fact in sharp decline. Did he at least “get the British out of India”? Some say no. India, in the last days of the British Raj, was already largely governed by Indians (a fact one would never suspect from this movie), and it is a common view that without this irrational, wildly erratic holy man the transition to full independence might have gone both more smoothly and more swiftly. There is much evidence that in his last years Gandhi was in a kind of spiritual retreat and, with all his endless praying and fasting, was no longer pursuing (the very words seem strange in a Hindu context) “the public good.” What he was pursuing, in a strict reversion to Hindu tradition, was his personal holiness. In earlier days he had scoffed at the title accorded him, Mahatma (literally “great soul”). But towards the end, during the hideous paroxysms that accompanied independence, with some of the most unspeakable massacres taking place in Calcutta, he declared, “And if... the whole of Calcutta swims in blood, it will not dismay me. For it will be a willing offering of innocent blood.” And in his last days, after there had already been one attempt on his life, he was heard to say, “I am a true Mahatma.”

We can only wonder, furthermore, at a public figure who lectures half his life about the necessity of abolishing modern industry and returning India to its ancient primiveness, and then picks a Fabian socialist, already drawing up Five-Year Plans, as the country’s first Prime Minister. Audacious as it may seem to contest the views of such heavy thinkers as Margaret Bourke-White, Ralph Nader, and J.K. Galbraith (who found the film’s Gandhi “true to the original” and endorsed the movie wholeheartedly), we have a right to reservations about such a figure as a public man.

I should not be surprised if Gandhi’s greatest real humanitarian achievement was an improvement in the treatment of Untouchables – an area where his efforts were not only assiduous, but actually bore fruit. In this, of course, he ranks well behind the British, who abolished suttee – over ferocious Hindu opposition – in 1829. The ritual immolation by fire of widows on their husbands’ funeral pyres, suttee had the full sanction of the Hindu religion, although it might perhaps be wrong to overrate its importance. Scholars remind us that it was never universal, only “usual.” And there was, after all, a rather extensive range of choice. In southern India the widow was flung into her husband’s fire-pit. In the valley of the Ganges she was placed on the pyre when it was already aflame. In western India, she supported the head of the corpse with her right hand, while, torch in her left, she was allowed the honor of setting the whole thing on fire herself. In the north, where perhaps women were more impious, the widow’s body was constrained on the burning pyre by long poles pressed down by her relatives, just in case, screaming in terror and choking and burning to death, she might forget her dharma. So, yes, ladies, members of the National Council of Churches, believers in the one God, mourners for the holy India before it was despoiled by those brutish British, remember suttee, that interesting, exotic practice in which Hindus, over the centuries, burned to death countless millions of helpless women in a spirit of pious devotion, crying for all I know, Hai Rama! Hai Rama!

I WOULD like to conclude with some observations on two Englishmen, Madeleine Slade, the daughter of a British admiral, and Sir...
Richard Attenborough, the producer, director and spiritual godfather of the film, *Gandhi*. Miss Slade was a jewel in Gandhi’s crown – a member of the British ruling class, as she was, turned fervent disciple of this Indian Mahatma. She is played in the film by Geraldine James with nobility, dignity, and a beatific manner quite up to the level of Candice Bergen, and perhaps even the Virgin Mary. I learn from Ved Mehta’s *Mahatma Gandhi and his Apostles*, however, that Miss Slade had another master before Gandhi. In about 1917, when she was fifteen, she made contact with the spirit of Beethoven by listening to his sonatas on a player piano. “I threw myself down on my knees in the seclusion of my room,” she wrote in her autobiography, “and prayed, really prayed to God for the first time in my life: ‘Why have I been born over a century too late? Why hast Thou given me realization of him and yet put all these years in between?’”

After World War I, still seeking how best to serve Beethoven, Miss Slade felt an “infinite longing” when she visited his birthplace and grave, and, finally, at the age of thirty-two, caught up with Romain Rolland, who had partly based his *Jean Christophe* on the composer. But Rolland had written a new book now, about a man called Gandhi, “another Christ,” and before long Miss Slade was quite literally falling on her knees before the Mahatma in India, “conscious of nothing but a sense of light.” Although one would never guess this from the film, she soon (to quote Mehta’s impression) began “to get on Gandhi’s nerves,” and he took every pretext to keep her away from him, in other ashrams, and working in schools and villages in other parts of India. She complained to Gandhi in letters about discrimination against her by orthodox Hindus, who expected her to live in rags and vile quarters during menstruation, considering her unclean and virtually untouchable. Gandhi wrote back, agreeing that women should not be treated like that, but adding that she should accept it all with grace and cheerfulness, “without thinking that the orthodox party is in any way unreasonable.” (This is as good an example as any of Gandhi’s coherence, even in his prime. Women should not be treated like that, but the people who treated them that way were in no way unreasonable.)

Some years after Gandhi’s death, Miss Slade rediscovered Beethoven, becoming conscious again “of the realization of my true self. For a while I remained lost in the world of the spirit. . . .” She soon returned to Europe and serving Beethoven, her “true calling.” When Mehta finally found her in Vienna, she told him, “Please don’t ask me any more about Bapu [Gandhi]. I now belong to van Beethoven. In matters of spirit, there is always a call.” A polite description of Miss Slade is that she was an extreme eccentric. In the vernacular, she was slightly cracked.

Sir Richard Attenborough, however, isn’t cracked at all. The only puzzle is how he suddenly got to be a pacifist, a fact which his press releases now proclaim to the world. Attenborough trained as a pilot in the RAF in World War II, and was released briefly to the cinema, where he had already begun his career in Noel Coward’s superpatriotic *In Which We Serve*. He then returned to active service, flying combat missions with the RAF. Richard Attenborough, in short – when Gandhi was pleading with the British to surrender to the Nazis, assuring them that “Hitler is not a bad man” – was fighting for his country. The Viceroy of India warned Gandhi grimly that “We are engaged in a struggle,” and Attenborough played his part in that great struggle, and proudly, too, as far as I can tell. To my knowledge he has never had a *crise de conscience* on the matter, or announced that he was carried away by the war fever and that Britain really should have capitulated to the Nazis – which Gandhi would have had it do.

ALTHOUGH the present film is handsomely done in its way, no one has ever accused Attenborough of being excessively endowed with either acting or directing talent. In the 50’s he was a popular young British entertainer, but his most singular gift appeared to be his entrepreneurial talent as a businessman, using his movie fees to launch successful London restaurants (at one time four), and other business ventures. At the present moment he is Chairman of the Board of Capital Radio (Britain’s most successful commercial station), Goldcrest Films, the British Film Institute, and Deputy Chairman of the BBC’s new Channel 4 television network. Like most members of the *nouveaux riches* on the rise, he has also reached out for symbols of respectability and public service, and has assembled quite a collection. He is Trustee of the Tate Gallery, Pro-Chancellor of Sussex University, President of Britain’s Muscular Dystrophy Group, Chairman of the Actors’ Charitable Trust and, of course, Chairman of the Royal Academy of Dramatic Art. There may be even more, but this is a fair sampling. In 1976, quite fittingly, he was knighted, by a Labor government, but his friends say he still insists on being called “Dickie.”

It is quite general today for members of the professional classes, even when not artistic types, to despise commerce and feel that the state, the economy, and almost everything else would be better and more ideally run by themselves rather than those loutish businessmen. Sir Dickie, however, being a highly successful businessman himself, would hardly entertain such an antipathy. But as he scrambled his way to the heights perhaps he found himself among high-minded idealists, utopians, equilibrarians, and lovers of the oppressed. Now there are those who think Sir Dickie converted to pacifism when Indira Gandhi handed him a check for several million dollars. But I do not believe this. I think Sir Dickie converted to pacifism out of idealism.

His pacifism, I confess, has been more than usually muddled. In 1968, after twenty-six years in the profession, he made his directorial
debut with *Oh! What a Lovely War*, with its superb parody of Britain’s jingoistic music-hall songs of the “Great War,” World War I. Since I had the good fortune to see Joan Littlewood’s original London stage production, which gave the work its entire style, I cannot think that Sir Dickie’s contribution was unduly large. Like most commercially successful parodies – from Sandy Wilson’s *The Boyfriend* to Broadway’s *Superman, Dracula*, and *The Crucifier of Blood* – *Oh! What a Lovely War* depended on the audience’s (if not Miss Littlewood’s) retaining a substantial affection for the subject being parodied: in this case, a swaggering hyper-patriotism, which recalled days when the empire was great. In any event, since Miss Littlewood identified herself as a Communist and since Communists, as far as I know, are never pacifists, Sir Dickie’s case for the production’s “pacifism” seems stymied from the other angle as well.

Sir Dickie’s next blow for pacifism was *Young Winston* (1973), which, the new publicity manual says, “explored how Churchill’s childhood traumas and lack of parental affection became the spurs which goaded him to . . . a position of great power.” One would think that a man who once flew combat missions under the orders of the great war leader – and who seemingly wanted his country to win – would thank God for childhood traumas and lack of parental affection if such were needed to provide a Churchill in the hour of peril. But on pressed Sir Dickie, in the year of his knighthood, with *A Bridge Too Far*, the story of the futile World War II assault on Arnhem, described by Sir Dickie – now, at least – as “a further plea for pacifism.”

But does Sir Richard Attenborough seriously think that, rather than go through what we did at Arnhem, we should have given in, let the Nazis be, and even – true pacifists – let them occupy Britain, Canada, the United States, contending ourselves only with “making them feel unwanted”? At the level of idiocy to which discussions of war and peace have sunk in the West, every hare-brained idealist who discovers that war is not a day at the beach seems to think he has found an irresistible argument for pacifism. Is Pearl Harbor an argument for pacifism? Bataan? Dunkirk? Dieppe? The Ardennes? Roland fell at Roncesvalles. Is the *Song of Roland* a pacifist epic? If so, why did William the Conqueror have it chanted to his men as they marched into battle at Hastings? Men prove their valor in defeat as well as in victory. Even Sergeant-Major Gandhi knew that. Up in the moral never-never land which Sir Dickie now inhabits, perhaps they think the Alamo led to a great wave of pacifism in Texas.

In a feat of sheer imbecility, Attenborough has dedicated *Gandhi* to Lord Mountbatten, who commanded the Southeast Asian Theater during World War II. Mountbatten, you might object, was hardly a pacifist – but then again he was murdered by Irish terrorists, which proves how frightful all that sort of thing is, Sir Dickie says, and how we must end it all by imitating Gandhi. Not the Gandhi who called for seas of innocent blood, you understand, but the movie-Gandhi, the nice one.

The historical Gandhi’s favorite mantra, strange to tell, was *Do or Die* (he called it literally that, a “mantra”). I think Sir Dickie should reflect on this, because it means, *dixit* Gandhi, that a man must be prepared to die for what he believes in, for, *himsa* or *ahimsa*, death is always there, and in an ultimate test men who are not prepared to face it lose. Gandhi was erratic, irrational, tyrannical, obstinate. He sometimes verged on lunacy. He believed in a religion whose ideas I find somewhat repugnant. He worshipped cows. But I still say this: he was brave. He feared no one.

On a lower level of being, I have consequently given some thought to the proper mantra for spectators of the movie *Gandhi*. After much reflection, in homage to Ralph Nader, I have decided on *Caveat Emptor*, “buyer beware.” Repeated many thousand times in a seat in the cinema it might with luck lead to *Om*, the Hindu dream of nothingness, the Ultimate Void.
